PROFESSIONAL PROFILE

Software developer with experience in React Native for cross-platform mobile development and front-end development using React, Next.js, HTML, CSS, JavaScript, and TypeScript, utilizing Git for version control. I implement CI/CD workflows for continuous and secure deployment, applying DevSecOps practices. I develop robust back-end solutions with Django and Flask, with efficient database management including SQL Server, SQLite, MySQL, MariaDB, and PostgreSQL.

Skilled in data analysis with pandas and creating interactive notebooks using Jupyter, facilitating data visualization and manipulation to support decision-making. I integrate design principles such as UI/UX, MVC, and UML to create systems aligned with business logic and user needs.

In individual and collaborative projects, I utilize agile methodologies such as Scrum (sprints, retrospectives) to deliver scalable, maintainable, and user-centered software.

WORK EXPERIENCE

Student Academic Assistant – Full-Stack Developer

Technological University of Panama (Alpha Persei)
April 2025 – Present

I collaborate in the development of an advanced scientific information system for the Technological University of Panama (UTP), using Django with templates and PostgreSQL as the database. My specific contributions include implementing functionalities for centralizing institutional research data, automated integration with external systems such as ORCID for academic profile synchronization, and development of the automated report generation module according to international standards (CONACYT, SENACYT). This work has significantly optimized the university's reporting processes and scientific information management.

Intern – Full-Stack Developer

Technological University of Panama (DEMI)
February – March 2025

I developed a complete web platform for institutional maintenance management at the Technological University of Panama (UTP), using Flask (Python), Vue.js, and MariaDB. The platform enables comprehensive request management, scheduling of preventive and corrective maintenance, task assignment, and inventory control. I implemented an authentication system with institutional credentials, a real-time tracking dashboard, and an interactive calendar accessible from any device connected to the university campus, improving the department's operational efficiency.

FEATURED PROJECTS

AI-Powered WhatsApp Chatbot

Development of a custom WhatsApp bot with intelligent and adaptive responses, using the Gemini AI API. Integration of advanced features to provide efficient and personalized customer service, with natural language processing capabilities and contextual responses.

Website for Graphic Design Company

Creation of a complete website for a graphic design company, using PHP and MySQL. Includes functionalities such as user login and registration system, service and portfolio management, and a comprehensive administration panel to manage content, users, and offered services.

EDUCATION

Bachelor's Degree in Software Development and Management

Technological University of Panama

March 2023 – December 2026

TECHNICAL SKILLS

Frontend: React, Next.js, Vue.js, React Native, HTML, CSS, JavaScript, TypeScript, Tailwind

Backend: Django, Flask, Python, PHP, Laravel

Databases: PostgreSQL, MySQL, MariaDB, SQLite, SQL Server

Tools: Git/GitHub, Docker, CI/CD, Jupyter Notebook

Data Analysis: Pandas, Data visualization

Design: Figma, UI/UX, MVC Principles, UML

Methodologies: Scrum, DevSecOps, Project management (Jira)

Languages: Spanish (Native), English (Intermediate)

INTERPERSONAL SKILLS

Problem-solving • Teamwork • Adaptability • Time management • Creativity • Effective communication • Continuous learning
